1. Organisation Overview:

Figure 1 Logo of the company

Name

Netcampus Group

Brief History

Netcampus Group is a South African Information and Communications Technology (ICT) training and technology solutions organisation. The organisation has more than two decades of experience in ICT training and has developed a presence across South Africa.

According to the organisation's official website, Netcampus has offices in Centurion, Fourways and Cape Town and provides training across all nine provinces. The organisation works with school leavers, individuals, professionals, businesses, government and other organisations.

Netcampus provides vendor-authorised technology training involving major technology providers such as Microsoft, AWS, Google and CompTIA. Its website currently lists hundreds of available courses and provides training schedules and certification-related services.

Mission

Netcampus's mission is to provide diverse technology training products, customised solutions and innovative training technologies that empower people with accessible and practical technology skills.

Vision

Netcampus aims to be a frontrunner in ICT training by empowering individuals to unlock their full potential and achieve excellence through innovative education and support.

Values

To support its mission and vision, Netcampus is guided by the following values:

- **Innovation** – Continuously adopting new technologies and teaching methods to stay ahead in ICT education.
- **Accessibility** – Ensuring training opportunities are available to diverse groups, including school leavers, professionals, and organisations.
- **Integrity** – Delivering training with honesty, transparency, and professionalism.
- **Excellence** – Striving for the highest standards in training delivery and learner support.
- **Collaboration** – Building strong partnerships with technology vendors, businesses, and government institutions.
- **Empowerment** – Equipping learners with practical skills that enhance employability and career growth.

Target Audience

The proposed website will target:

- School leavers interested in technology careers.
- Students and graduates.
- IT professionals.
- Individuals looking to obtain technology certifications.
- Businesses requiring employee training.
- Government organisations.
- NGOs and other organisations requiring ICT skills development.

2. Website Goals and Objectives:

Goals

The main goal of the proposed website is to provide users with clear, accessible and organised information about Netcampus, its services, courses and physical locations.

Objectives

The website objectives are as follow:

- Increase awareness of Netcampus and its ICT training services.
- Make information about courses easier to access.
- Provide users with clear information about the organisation.
- Provide easy access to contact information.
- Allow users to identify Netcampus office locations.
- Present the organisation's vision, mission and values.
- Encourage prospective learners and organisations to make enquiries.

Key Performance Indicators (KPIs)

The success of the website can be measured using:

- Number of website visitors.
- Number of course enquiries.
- Number of contact form submissions.
- Number of users viewing course information.
- Number of users accessing the contact/location page.
- Number of users returning to the website.
- Number of potential learners making training enquiries.

3. Current Website Analysis

Netcampus already has an established website containing information about its organisation, courses, technologies, schedules, events, certification and contact information.

Strengths

The existing website has several strengths:

- It provides extensive course information.
- It includes course schedules.
- It presents the organisation's history and values.
- It provides information about recognised technology vendors.
- It provides contact information and physical office locations.
- It provides access to certification and examination information.

- It provides information for both individuals and organisations.

Weaknesses

- **Home Page:** Overloaded with text; lacks clear CTA; needs updated graphics.
- **About Us:** Vision and mission not visually engaging; no values section; lacks testimonials.
- **Services:** Listed but not explained in detail; no case studies; needs interactive elements.
- **Courses:** Difficult to navigate; lacks filtering options; needs enquiry integration.
- **Contact Us:** Contact details not interactive; no live chat; basic Google Maps integration.

Areas for Improvement

For the proposed student website, the information architecture will be simplified so that users can quickly find the most important information.

The proposed website will focus on five main pages:

1. Home
2. About Us
3. Services
4. Courses
5. Contact Us

The Vision, Mission and values will be incorporated into the **About Us** page rather than being placed on a separate page.

The physical Site Map will be incorporated into the **Contact Us** page so that users can immediately locate Netcampus offices when looking for contact information.

4. Proposed Website Features and Functionality

Home Page

The home page will introduce Netcampus and provide a short overview of its ICT training services.

It will contain:

- Organisation name.
- Welcome message.
- Main image.
- Short company introduction.
- Reasons to choose Netcampus.
- Links to other pages.

Figure 2 Executives of the company.

About Us Page

The About Us page will provide:

- Company history.
- Organisation overview.
- Vision.
- Mission.
- Core values.
- Target audience.

Services Page

The Services page will explain:

- ICT training.
- Corporate training.
- Youth development.
- Learning solutions.
- eLearning.
- Technology skills development.

Courses Page

The Courses page will present major training areas such as:

- Information Technology.
- Cloud Computing.
- Cybersecurity.
- Networking.
- Software Development.
- Data and Analytics.
- Project Management.

- Vendor-specific technology training.

Netcampus's current course information demonstrates training in areas including Microsoft Azure, CompTIA, cybersecurity and software development.

Contact Us Page

The Contact page will include:

- Telephone numbers.
- Email address.
- Physical addresses.
- Contact form.
- Office information.
- Embedded Google Maps.
- Site Map showing the physical locations of Netcampus offices.

5. Design and User Experience

Colour Scheme

The proposed design will use a professional technology-oriented colour palette consisting primarily of:

- Dark blue.
- White.
- Light grey.
- Black.

The colour scheme is intended to communicate professionalism, technology and reliability.

Typography

The website will use clear and readable fonts.

Headings will be larger and more prominent than paragraph text to create a clear information hierarchy.

Layout and Design

The website will use a simple and structured layout consisting of:

- Header.
- Navigation menu.
- Main content area.
- Images.
- Headings and paragraphs.
- Lists.
- Contact section.
- Footer.

User Experience

The navigation will remain consistent on every page.

Users will be able to move between pages using hyperlinks.

The website will use descriptive headings and organised content to make information easy to locate.

Low-Fidelity Wireframe

6. Technical Requirements

Programming Languages

The proposed student version of the website will primarily use:

- HTML5
- CSS
- Js

HTML will be used to structure the website content and create hyperlinks between pages.

Additional Technologies

Google Maps will be embedded using an HTML iframe for the physical office locations.

YouTube video

Development Environment

The website will be developed using:

- Visual Studio Code.
- Web browser such as Google Chrome or Microsoft Edge.
- Local project folders.
- HTML files.
- Image files.
- CSS files
- Js files

Hosting and Domain

If deployed commercially, the website would require:

- A domain name.
- Web hosting.
- SSL certificate.
- Website maintenance.

7. Timeline and Milestones

Week	Activity
Week 1	Research Netcampus and gather information
Week 2	Create proposal and obtain lecturer approval
Week 3	Develop website structure and navigation
Week 4	Develop Home, About and Services pages
Week 5	Develop Courses and Contact pages
Week 6	Add images, maps and hyperlinks
Week 7	Test all pages and hyperlinks
Week 8	Correct errors and improve content
Week 9	Final testing and documentation
Week 10	Final submission

8. Budget

The following is a realistic, estimated budget for a small professional website project:

Item	Estimated Cost
Domain registration	R200
Web hosting	R1,500
Website development	R8,000
Content preparation	R2,000
Images and media	R1,000
Testing and quality assurance	R1,500
Annual maintenance	R3,000
Estimated First-Year Total	R17,200

The student version will not incur these commercial development costs because it will be developed locally using Visual Studio Code and submitted as an academic project.
