

WEBSITE PROJECT PROPOSAL 2: FOODFORWARD SA

Student Name: [Your Name]

Student Number: [Your Student Number]

Module: [Module Name]

Organisation: FoodForward SA

Organisation Type: Non-Profit Organisation

Proposed Website: FoodForward SA Website Redesign

1. Organisation Overview

Name

FoodForward SA

Brief History

FoodForward SA is a South African non-profit organisation established in 2009 to address food and nutrition insecurity.

The organisation's model focuses on recovering quality surplus food from the consumer goods supply chain and redistributing it to vulnerable communities through a network of vetted Beneficiary Organisations.

FoodForward SA states that its presence extends across all nine provinces of South Africa.

The organisation's work addresses two related problems: food insecurity and food waste.

Mission

FoodForward SA's mission is to reduce hunger in South Africa by safely and cost-effectively securing quality food and making it available to those who need it.

Vision

FoodForward SA's vision is:

A South Africa without hunger.

Target Audience

The proposed website will target:

- Individuals who want to donate money.
- Businesses that can donate surplus food.
- Volunteers.
- Community organisations.
- Beneficiary organisations.

- Potential corporate partners.
 - Members of the public seeking information about food insecurity.
 - Researchers and stakeholders interested in food security.
-

2. Website Goals and Objectives

The main purpose of the proposed website is to make it easier for people to understand FoodForward SA's work and participate through donations, volunteering, food contributions and partnerships.

Website Goals

The website will:

- Increase awareness of food insecurity in South Africa.
- Explain how FoodForward SA's foodbanking model works.
- Encourage financial donations.
- Encourage food donations.
- Increase volunteer participation.
- Provide information about the organisation's programmes.
- Provide contact and branch information.
- Demonstrate the organisation's measurable social impact.

Key Performance Indicators

The website's performance can be measured through:

- Number of website visitors.
 - Number of donation enquiries.
 - Number of online donation interactions.
 - Number of volunteer registrations.
 - Number of food donation enquiries.
 - Number of beneficiary organisation applications.
 - Number of contact form submissions.
 - Number of newsletter subscriptions.
 - Number of programme page views.
-

3. Current Website Analysis

FoodForward SA already has an established website that provides information about its programmes, impact, donation options, contact details and organisational background.

Strengths

The existing website:

- Clearly communicates the organisation's mission.
- Provides information about its foodbanking model.
- Provides donation options.
- Provides programme information.
- Shows measurable impact.
- Provides branch and contact information.
- Provides access to annual reports.
- Provides opportunities for volunteers and donors to participate.

FoodForward SA currently highlights programmes including Warehouse Foodbanking, Virtual Foodbanking, Mother & Child Nutrition, Food Gardens Connect, School Breakfast, Mobile Rural Distribution and Disaster Relief.

Areas for Improvement

The proposed academic website would simplify the large amount of information into a smaller number of clearly structured pages.

The proposed structure would prioritise the actions most important to the organisation:

- Learn about FoodForward SA.
- Understand its programmes.
- Donate.
- Volunteer.
- Contact the organisation.
- Find branch locations.

4. Proposed Website Features and Functionality

Home Page

The Home page will immediately communicate the organisation's purpose.

It will include:

- FoodForward SA name.
- Introduction.
- Main image.
- Vision statement.
- Short explanation of foodbanking.
- Impact statistics.
- Donate button/link.
- Volunteer button/link.
- Navigation menu.

About Us Page

The About Us page will include:

- History.
- Vision.
- Mission.
- Food insecurity information.
- FoodForward SA's foodbanking model.
- Organisational values.
- Target beneficiaries.

Programmes Page

The Programmes page will describe:

- Warehouse Foodbanking.
- Virtual Foodbanking.
- Mother & Child Nutrition.
- Food Gardens Connect.
- School Breakfast Programme.
- Mobile Rural Distribution.
- Disaster Relief.

Get Involved Page

The page will allow users to understand how they can contribute.

Sections will include:

- Donate Funds.
- Donate Food.
- Volunteer.
- Corporate Partnerships.
- Community Support.

Contact and Locations Page

The Contact page will include:

- National office information.
- Branch locations.
- Telephone numbers.
- Email address.
- Contact form.
- Physical locations.
- Embedded maps.

FoodForward SA currently lists its national office at 21 Polaris Road, Lansdowne, Cape Town and provides branch information for provinces including Gauteng, KwaZulu-Natal, Free State and Eastern Cape, while some provinces are serviced by nearby warehouses.

Impact Page

The Impact page will display:

- Meals provided.
- Food distributed.
- Beneficiary organisations.
- People reached.
- Environmental impact.
- Annual reports.

FoodForward SA reported that during the 2024/2025 financial year it distributed approximately 82.9 million meals through 2,519 beneficiary organisations, reaching more than 935,000 vulnerable people daily.

5. Design and User Experience

Colour Scheme

The proposed website will use a warm and community-focused colour palette consisting of:

- Green.
- Orange.
- White.
- Dark grey.

Green will represent growth, food and sustainability.

Orange will represent warmth, community and action.

Typography

The website will use a clean and readable sans-serif font.

Large headings will be used for important messages and calls to action.

Layout and Design

The proposed design will use:

- Large photographs of food distribution and community activities.
- Clear calls to action.
- Short paragraphs.
- Statistics.
- Organised sections.
- Simple navigation.
- Prominent donation and volunteer options.

User Experience

A visitor should be able to understand what FoodForward SA does within a few seconds of opening the website.

The most important actions — Donate, Donate Food and Volunteer — should be easily accessible.

6. Technical Requirements

Programming Languages

The academic prototype will primarily use:

- HTML5.

Development Environment

The website will be developed using:

- Visual Studio Code.
- Google Chrome or Microsoft Edge.
- HTML.
- Image files.
- Local project folders.

Proposed File Structure

FoodForwardSA/

```
|
|— index.html
|— about.html
|— programmes.html
|— get-involved.html
|— contact.html
|— impact.html
|
└─ images/
    |— foodbank.jpg
    |— volunteers.jpg
    |— food-distribution.jpg
    └─ community.jpg
```

Additional Functionality

The website may use:

- Embedded Google Maps.
- Hyperlinks.
- Contact forms.
- Images.
- Tables for impact statistics.
- Lists for programmes and services.

Hosting and Domain

A commercial deployment would require:

- Domain registration.
- Web hosting.
- SSL certificate.
- Website maintenance.
- Regular content updates.

7. Timeline and Milestones

Week Activity

Week 1 Research FoodForward SA

Week 2 Develop proposal and obtain approval

Week 3 Collect images and content

Week 4 Develop website structure

Week 5 Develop Home and About pages

Week 6 Develop Programmes and Get Involved pages

Week 7 Develop Contact and Impact pages

Week 8 Add maps, images and hyperlinks

Week 9 Test website and correct errors

Week 10 Final documentation and submission

8. Budget

The following is a realistic estimated budget for developing and maintaining a small professional NPO website:

Item	Estimated Cost
Domain registration	R200
Web hosting	R1,500
Website development	R8,000
Content preparation	R2,500
Photography and media	R1,500
Testing and quality assurance	R1,500
Annual maintenance	R3,000

Estimated First-Year Total R18,200

The academic prototype would not require these commercial development costs because it would be developed locally using Visual Studio Code.
